

# Kevin D Knapp

## IT Solutions Professional

### Objective

Seeking challenging opportunities with a progressive company that values merit and demonstrated contributions. I aim to secure a role in software development and system administration where I can utilize my expertise in web technologies and programming languages to create innovative solutions and ensure efficient operations.

### Experience

October 2010 - Current

#### **Web & Application Programmer** *Auto Trakk, LLC / Montoursville, PA*

Design, develop, and maintain both web-based and command-line user interfaces using various programming and scripting languages. Create and maintain custom software solutions and web application APIs, perform system administration for OpenVMS, Linux, and Windows, and manage and support hardware configuration. Additionally, administer Citrix Hypervisor/XenServer, develop responsive web applications, and provide user training and support.

May 2009 – October 2010

#### **IT Manager / Programmer** *Import Parts Warehouse / Denver, CO*

Developed an online order tracking and ticket API for RockAuto.com, enabling real-time access to parts inventory. Provided help desk support for software and hardware issues, developed public, intranet, and wiki web applications, and conducted network and security administration. Administered Windows systems, provided support, and managed a VMware environment.

May 1997 – May 2009

#### **Systems Analyst / Programmer** *SFFA, Inc / Lakewood, CO*

Converted a legacy system to web-based technologies for Auto Trakk, LLC, supporting thousands of daily users. Installed and configured multiple network platforms and remote access systems. Administered and managed OpenVMS and Windows servers. Developed a web-based in-house support tracking and ticketing system, and provided help desk support for networks, software, and hardware.

### Education

1995 - 1996

**Denver Institute of**

**Technology**

Denver, CO

Associate Degree in  
Computer Programming (3.9  
GPA)
